The annual Zayed Future Energy Prize (ZFEP) is now accepting submissions for the 2017 Global High School Prize. US $100,000 will be granted to the school with the most innovative educational project focusing on renewable energy and sustainability. The prize money can be used to fund a proposed educational project or to complete an ongoing project.

ZFEP is an award managed by Masdar, a clean energy company based in Abu Dhabi. Masdar is creating Masdar City; one of the world’s most sustainable cities that operates as a research hub and nurtures business partnerships for the future.

The winner in the Oceania region for 2016 was Cashmere High School (Aotearoa). The other finalists were Lume Regional Training College (Vanuatu) and Huonville High School (Australia).

The Global High School Prize is awarded to a high school in five global regions - Asia, Africa, Europe, the Americas and our region Oceania. An Australian company, Business Outlook and Evaluation, is the Prize’s outreach partner and provides complimentary support to applicants with their submissions. Applications close June 27th 2016.

For online submissions, or for more information, please contact Oceania’s schools coordinator, Ms Kirsten Powell at kirsten@businessoutlook.com.au or mobile +61 402 111 627 or visit the website below.
